Address : Bangkok, TH.

## About Me

A passionate developer who is interested in how things work. I enjoy working collaboratively but I can also work independently. I'm looking to join forces with a company to continue to grow my skill set while contributing with others.

## Interests

- Web Development
- Software Development
- Full-Stack Development

## Educations

- Bangkok University
  - School of Information Technology and Innovation, Computer Science.

## Work Experience

- Joined Bangkok University Multimedia Intelligent Technology as a member. Since 1st June 2022 - Present

## Projects

- School Bus Platform to avoid trapped kindergarten students.
  - A platform to alert parents when there is a student trapped in the bus.
  - Build and develop web applications with RESTFUL api with Django as a back-end and Next.js as a front-end. Allow mobiles and raspberry pi to communicate with RESTFUL api.
- AADS (Army Air Defense System)
  - A military program to control aircrafts from surveillance radars around Thailand.
  - Build, implement and develop both client side using C#, .net, Gmap.net, winforms and server side using Node.js, SQL Server and client communicated by socket.

## Likes

- Coding.
- hanging around with the community.

## Dislike

- Loud places
- Unformatted Code

## Social

- : king-glitch
- : william-siefert

## Hard Skills

- Coding
  - Database : SQL, NoSql, GraphQL
  - Programming Languages : TypeScript, JavaScript, Java,C#, Python, PHP, HTML, css
  - Frameworks : Node.js, React.js, Next.js, Electron.js, Laravel, Django, Socket.io
- Logical Programming

## Soft Skills

- Complex Problem Solving, Collaboration, Adaptability, Time Management, Life-Long Learning.

## Languages

- Thai (Native)
- English (Good)
